

# Every facade, Stone Age to near future.

Every grammar the kit has, in chronological order, photographed from three angles on the same shell within its size class. The eight eras the kit had no answer for were written for this sheet — and most of them were unbuildable until a facade could tell the shell to hand over the wall plane, because almost none of them have glazing.

## THREE-QUARTER

The honest single frame: entrance face and one flank at once, so ornament applied only to the front cannot hide.

## WHO OWNS THE WALL

A grammar now declares it. **keep** — the shell glazes as always, and its real furnished rooms show through. **frame** — punched masonry openings to set piers and arches around. **own** — solid wall, no glazing, and the culture's own openings, or none at all.

## FROM THE PAVEMENT

Where a player actually meets the building. Judges the door, the reach, and whether it still reads from underneath.

## REAR THREE-QUARTER

The cheat detector: a facade that spent everything on the door elevation looks fine in the other two frames and empty here. On tower plates this frame is the crown instead — a tower wraps all four faces by construction, and what it lives on is how it ends.

# The ladder

Ordered by era, oldest first; numbers run straight through the ladder, so “I want 4, 9, 17 and 22” means the same four buildings next week. Each grammar is photographed on the subject its size class uses — houses at 15×11 m, blocks at 22×16 m, towers at 34×28 m over 40 storeys — so a bungalow is never compared against a supertall. Full plate for each on the pages that follow.

# 1 Dry-Stone Broch

STONE AGE · HOUSE · drystone · 15×11 M, 2 STOREYS

Three-quarter — the honest single frame

Skara Brae / broch. Coursed unmortared rubble battering inward, a corbelled roof closing to a smoke hole, a creep entrance under one massive lintel. No windows.

**AS A CITY:** A Neolithic settlement — huts, a passage tomb, a stone circle, a souterrain. The oldest thing a city can be.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |       |
|------------------------------|--------|---------------------|-------|
| Crown above the bare shell   | +5.6 m | Tallest point       | 12 m  |
| Things breaking the roofline | 18     | Triangles           | 8,172 |
| Merged deco boxes (free)     | 681    | Minted meshes (not) | 0     |

# 2 Neolithic Longhouse

STONE AGE · HOUSE · longhouse · 15×11 M, 2 STOREYS

Three-quarter — the honest single frame

The roof IS the building: enormous thatch sweeping nearly to the ground, crossed ridge poles, heavy gable posts, one door, no windows.

AS A CITY: A forest-clearing village of longhouses, a palisade, a granary on posts.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |         |                     |        |
|------------------------------|---------|---------------------|--------|
| Crown above the bare shell   | +10.1 m | Tallest point       | 16.5 m |
| Things breaking the roofline | 34      | Triangles           | 3,636  |
| Merged deco boxes (free)     | 303     | Minted meshes (not) | 0      |

# 3 Wattle Roundhouse

STONE AGE · HOUSE · wattle · 15×11 M, 2 STOREYS

Three-quarter — the honest single frame

Conical thatch over daub walls showing the stake-and-weave beneath, a ring of posts, a two-post porch. Made to read round on a rectangular plan.

AS A CITY: An Iron Age roundhouse cluster inside a ditch and bank.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |         |                     |       |
|------------------------------|---------|---------------------|-------|
| Crown above the bare shell   | +13.6 m | Tallest point       | 20 m  |
| Things breaking the roofline | 13      | Triangles           | 4,836 |
| Merged deco boxes (free)     | 382     | Minted meshes (not) | 6     |

# 4 Mudbrick Ziggurat

BRONZE AGE · MID-RISE BLOCK · urziggurat · 22×16 M, 4 STOREYS

Three-quarter — the honest single frame

Ur. Three receding battered terraces, a monumental triple stair, reeded pilaster-and-buttress rhythm on every face, a shrine on the summit. Not to be confused with the 1916 zoning tower that shares the word.

AS A CITY: A Mesopotamian temple-city: ziggurat, mudbrick courtyard houses, a walled precinct, a gate of glazed brick.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +5.7 m | Tallest point       | 18.5 m |
| Things breaking the roofline | 12     | Triangles           | 6,828  |
| Merged deco boxes (free)     | 569    | Minted meshes (not) | 0      |

# 5 Mastaba & Pylon

BRONZE AGE · MID-RISE BLOCK · mastaba · 22×16 M, 4 STOREYS

Three-quarter — the honest single frame

Egyptian. Walls battering inward, a torus roll up every corner, a cavetto cornice flaring at the top, a pylon gate with flagstaff niches.

AS A CITY: A Nile temple precinct — pylon, hypostyle hall, mastaba tombs, an avenue of sphinxes.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +9.2 m | Tallest point       | 22 m   |
| Things breaking the roofline | 13     | Triangles           | 13,080 |
| Merged deco boxes (free)     | 1090   | Minted meshes (not) | 0      |

# 6 Minoan Palace

BRONZE AGE · MID-RISE BLOCK · minoan · 22×16 M, 4 STOREYS

Three-quarter — the honest single frame

Knossos. The downward-tapering column — wider at the top, the opposite of every other column in the kit — red and black banding, a colonnaded light-well, horns of consecration on the parapet.

AS A CITY: An Aegean palace town: the palace, storerooms, a theatral area, terraced houses down to a harbour.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +2.7 m | Tallest point       | 15.5 m |
| Things breaking the roofline | 8      | Triangles           | 23,336 |
| Merged deco boxes (free)     | 1944   | Minted meshes (not) | 4      |

# 7 Roman Villa

CLASSICAL ANTIQUITY · HOUSE · romanvilla · 15×11 M, 2 STOREYS

Three-quarter — the honest single frame

Roman villa: a low tile roof, a colonnaded peristyle, stuccoed masonry, a courtyard the building wraps.

AS A CITY: A Mediterranean antique quarter — villa, baths, forum stoa, insula.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +3.9 m | Tallest point       | 10.3 m |
| Things breaking the roofline | 14     | Triangles           | 18,420 |
| Merged deco boxes (free)     | 1495   | Minted meshes (not) | 4      |

# 8 Pueblo Adobe

INDIGENOUS AMERICAS · MID-RISE BLOCK · adobe · 22×16 M, 4 STOREYS

Three-quarter — the honest single frame

Earthen mass: battered walls thickening to the base, projecting vigas, stepped massing, small deep-set windows, a latilla porch. Irregularity IS the style.

AS A CITY: A pueblo/Saltlands town — mission church, trading post, stacked terraced dwellings.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +1.7 m | Tallest point       | 14.5 m |
| Things breaking the roofline | 24     | Triangles           | 16,912 |
| Merged deco boxes (free)     | 1382   | Minted meshes (not) | 10     |

# 9 Maya Temple-Pyramid

INDIGENOUS AMERICAS · MID-RISE BLOCK · mayatemple · 22×16 M, 4 STOREYS

Three-quarter — the honest single frame

Tikal. A far steeper stepped pyramid than a ziggurat, a small cella on the summit, and a roof comb standing above it taller than the cella itself. The comb is the silhouette.

AS A CITY: A Maya city — temple pyramids, a palace range, a ballcourt, stelae in a plaza.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |         |                     |       |
|------------------------------|---------|---------------------|-------|
| Crown above the bare shell   | +14.2 m | Tallest point       | 27 m  |
| Things breaking the roofline | 23      | Triangles           | 2,940 |
| Merged deco boxes (free)     | 245     | Minted meshes (not) | 0     |

# 10 Puuc Palace

INDIGENOUS AMERICAS · MID-RISE BLOCK · puuc · 22×16 M, 4 STOREYS

Three-quarter — the honest single frame

Uxmal. A plain lower wall and, above a medial moulding, an encrusted upper frieze of stone mosaic: colonnettes, stepped fret, stacked long-nosed masks at the corners.

AS A CITY: A Puuc hill town: palace, nunnery quadrangle, arch gateway, chultun cisterns.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +1.2 m | Tallest point       | 14 m   |
| Things breaking the roofline | 7      | Triangles           | 17,508 |
| Merged deco boxes (free)     | 1459   | Minted meshes (not) | 0      |

# 11 Talud-Tablero Platform

INDIGENOUS AMERICAS · MID-RISE BLOCK · talud · 22×16 M, 4 STOREYS

Three-quarter — the honest single frame

Teotihuacan. A repeating unit stacked up the elevation — sloping talud, then a framed vertical tablero that oversails it. The projecting frame throws the shadow that makes the profile.

AS A CITY: The Avenue of the Dead: platforms, apartment compounds, a painted precinct.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |       |
|------------------------------|--------|---------------------|-------|
| Crown above the bare shell   | +1.2 m | Tallest point       | 14 m  |
| Things breaking the roofline | 8      | Triangles           | 3,120 |
| Merged deco boxes (free)     | 260    | Minted meshes (not) | 0     |

# 12 Gothic Revival

MEDIEVAL EUROPE · MID-RISE BLOCK · gothic · 22×16 M, 4 STOREYS

Three-quarter — the honest single frame

Gothic Revival civic front: buttresses stepping back as they rise, pinnacles breaking the roofline, tracery, a rose window over a deep portal. Everything ends in a point.

AS A CITY: An old-world cathedral town — the hall, the guild, the college quad, the parish church.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |      |                     |        |
|------------------------------|------|---------------------|--------|
| Crown above the bare shell   | +7 m | Tallest point       | 19.8 m |
| Things breaking the roofline | 9    | Triangles           | 55,176 |
| Merged deco boxes (free)     | 4598 | Minted meshes (not) | 0      |

# 13 English Manor

MEDIEVAL EUROPE · HOUSE · manor · 15×11 M, 2 STOREYS

Three-quarter — the honest single frame

English manor: steep gables, half-timbering, tall grouped chimney stacks, leaded casements, a stone porch bay.

AS A CITY: A Tudor village — inn, church, market hall, timbered terrace.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |         |                     |        |
|------------------------------|---------|---------------------|--------|
| Crown above the bare shell   | +11.4 m | Tallest point       | 17.8 m |
| Things breaking the roofline | 20      | Triangles           | 13,224 |
| Merged deco boxes (free)     | 1086    | Minted meshes (not) | 6      |

# 14 Stave Church

MEDIEVAL EUROPE · HOUSE · stave · 15×11 M, 2 STOREYS

Three-quarter — the honest single frame

Borgund. Steeply pitched shingled roofs stacked in diminishing tiers climbing to a point, dragon-head finials at the gables, an external gallery on posts, vertical stave planking.

AS A CITY: A Norse valley: stave church, longhouse farmstead, a stabbur on staddle stones, a boathouse.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |         |                     |        |
|------------------------------|---------|---------------------|--------|
| Crown above the bare shell   | +16.6 m | Tallest point       | 23 m   |
| Things breaking the roofline | 29      | Triangles           | 13,488 |
| Merged deco boxes (free)     | 1124    | Minted meshes (not) | 0      |

# 15 Russian Izba

MEDIEVAL EUROPE · HOUSE · izba · 15×11 M, 2 STOREYS

Three-quarter — the honest single frame

Horizontal log courses with interlocked corners whose ends project past the wall at every course, a raised podklet, a carved bargeboard, nalichniki window surrounds.

**AS A CITY:** A Russian village — izby along one street, a wooden church, a bathhouse, a well crane.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +8.4 m | Tallest point       | 14.8 m |
| Things breaking the roofline | 10     | Triangles           | 8,544  |
| Merged deco boxes (free)     | 712    | Minted meshes (not) | 0      |

# 16 Grand Mosque

ISLAMIC WORLD & SILK ROAD · MID-RISE BLOCK · mosque · 22×16 M, 4 STOREYS

Three-quarter — the honest single frame

Dome on a buttressed drum, a minaret off one corner, horseshoe arcade, monumental pishtaq portal.

AS A CITY: An Islamic old city: the great mosque, the madrasa, the caravanserai, the covered bazaar. Big cultural payoff.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |       |                     |        |
|------------------------------|-------|---------------------|--------|
| Crown above the bare shell   | +16 m | Tallest point       | 28.8 m |
| Things breaking the roofline | 28    | Triangles           | 22,602 |
| Merged deco boxes (free)     | 1645  | Minted meshes (not) | 25     |

# 17 Caravanserai

ISLAMIC WORLD & SILK ROAD · MID-RISE BLOCK · caravanserai · 22×16 M, 4 STOREYS

Three-quarter — the honest single frame

A fortified block with corner towers, a crenellated parapet and almost no openings, spending everything on one monumental iwan portal projecting above the parapet.

**AS A CITY:** A Silk Road halt: caravanserai, covered bazaar, madrasa, a domed cistern.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +3.7 m | Tallest point       | 16.5 m |
| Things breaking the roofline | 9      | Triangles           | 7,644  |
| Merged deco boxes (free)     | 637    | Minted meshes (not) | 0      |

# 18 Nagara Temple

SOUTH & SOUTHEAST ASIA · MID-RISE BLOCK · shikhara · 22×16 M, 4 STOREYS

Three-quarter — the honest single frame

Khajuraho. A curvilinear tower of stacked receding courses that rises vertically then curves in, an amalaka disc and pot finial at the apex, a mandapa porch under its own stepped roof, a star-pointed plan.

AS A CITY: A Nagara temple town: shikhara, tank with ghats, a pillared hall, subsidiary shrines.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |         |                     |       |
|------------------------------|---------|---------------------|-------|
| Crown above the bare shell   | +27.2 m | Tallest point       | 40 m  |
| Things breaking the roofline | 65      | Triangles           | 6,502 |
| Merged deco boxes (free)     | 501     | Minted meshes (not) | 7     |

# 19 Khmer Prasat

SOUTH & SOUTHEAST ASIA · MID-RISE BLOCK · prasat · 22×16 M, 4 STOREYS

Three-quarter — the honest single frame

Angkor. A quincunx — one central tower and four at the corners — each a stack of diminishing storeys with antefix horns at every tier, false doors on three sides, naga balustrades.

AS A CITY: A Khmer temple-city: prasat, gopura gates, a baray reservoir, a laterite causeway.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |         |                     |       |
|------------------------------|---------|---------------------|-------|
| Crown above the bare shell   | +21.2 m | Tallest point       | 34 m  |
| Things breaking the roofline | 37      | Triangles           | 7,722 |
| Merged deco boxes (free)     | 640     | Minted meshes (not) | 1     |

# 20 Stupa & Pyatthat

SOUTH & SOUTHEAST ASIA · MID-RISE BLOCK · stupa · 22×16 M, 4 STOREYS

Three-quarter — the honest single frame

Bagan. A bell on a stepped terrace under an hti — a spire of diminishing rings — with a pyatthat, the multi-tiered spired roof, over the entrance hall.

AS A CITY: A plain of pagodas: stupa, ordination hall, monastery, a pyatthat gate.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |         |                     |        |
|------------------------------|---------|---------------------|--------|
| Crown above the bare shell   | +27.5 m | Tallest point       | 40.3 m |
| Things breaking the roofline | 24      | Triangles           | 19,626 |
| Merged deco boxes (free)     | 1622    | Minted meshes (not) | 2      |

# 21 Tiered Eaves

EAST ASIA · MID-RISE BLOCK · pagoda · 22×16 M, 4 STOREYS

Three-quarter — the honest single frame

Timber frame under deep tiered eaves with upturned corners on visible dougong brackets. The lowest eave projects the furthest.

AS A CITY: An East Asian temple quarter: gate, hall, drum tower, pagoda proper.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |         |                     |        |
|------------------------------|---------|---------------------|--------|
| Crown above the bare shell   | +12.5 m | Tallest point       | 25.3 m |
| Things breaking the roofline | 27      | Triangles           | 31,068 |
| Merged deco boxes (free)     | 2527    | Minted meshes (not) | 16     |

# 22 Japanese Residence

EAST ASIA · HOUSE · machiya · 15×11 M, 2 STOREYS

Three-quarter — the honest single frame

Japanese townhouse/minka: a low timber frame with pale plaster infill, a veranda deck along the street face, one enormous tiled roof with deep eaves.

AS A CITY: A machiya street — shop-house, teahouse, gate house, storehouse (kura).

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +4.6 m | Tallest point       | 11 m   |
| Things breaking the roofline | 14     | Triangles           | 16,600 |
| Merged deco boxes (free)     | 1370   | Minted meshes (not) | 2      |

# 23 Sahelian Mudbrick

AFRICA · MID-RISE BLOCK · sahelian · 22×16 M, 4 STOREYS

Three-quarter — the honest single frame

Djenne. Engaged buttress piers running the full height and ending in cone finials, toron palm beams studding the whole elevation in a grid, battered mud walls, a parapet of pinnacles. No windows.

AS A CITY: A Sahelian city of earth: the great mosque, a merchant quarter, mud granaries, a Friday market square.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +3.7 m | Tallest point       | 16.5 m |
| Things breaking the roofline | 19     | Triangles           | 20,604 |
| Merged deco boxes (free)     | 1637   | Minted meshes (not) | 8      |

# 24 Great Zimbabwe Dry-Stone

AFRICA · MID-RISE BLOCK · zimbabwe · 22×16 M, 4 STOREYS

Three-quarter — the honest single frame

The Great Enclosure. Coursed granite laid without mortar, battering and thickening enormously at the base, almost no openings, a chevron course near the top and a solid conical tower.

AS A CITY: A dry-stone capital: the enclosure, the hill complex, narrow parallel passages, a valley of daga huts.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +1.9 m | Tallest point       | 14.8 m |
| Things breaking the roofline | 9      | Triangles           | 14,292 |
| Merged deco boxes (free)     | 1191   | Minted meshes (not) | 0      |

# 25 Swahili Coral-Stone

AFRICA · HOUSE · swahili · 15×11 M, 2 STOREYS

Three-quarter — the honest single frame

Lamu. Coral rag under lime plaster, a flat terrace roof behind a low parapet, a deeply carved timber door in a frame far larger than it needs, zidaka niches, a baraza bench at the street.

**AS A CITY:** A Swahili stone town: merchant houses, a mosque, a customs house, alleys too narrow for carts.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |       |
|------------------------------|--------|---------------------|-------|
| Crown above the bare shell   | +0.8 m | Tallest point       | 7.3 m |
| Things breaking the roofline | 6      | Triangles           | 6,084 |
| Merged deco boxes (free)     | 507    | Minted meshes (not) | 0     |

# 26 Florentine Palazzo

RENAISSANCE & BAROQUE · MID-RISE BLOCK · palazzo · 22×16 M, 4 STOREYS

Three-quarter — the honest single frame

Strozzi. Three storeys getting smoother as they rise — rock-faced, then channelled, then near-ashlar — bifora windows, corner quoin chains, and an enormous cornice throwing a hard band of shade.

AS A CITY: A Florentine quarter: palazzi, a loggia, a baptistery, a bridge lined with shops.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +1.4 m | Tallest point       | 14.3 m |
| Things breaking the roofline | 9      | Triangles           | 65,028 |
| Merged deco boxes (free)     | 5419   | Minted meshes (not) | 0      |

# 27 Baroque Church Front

RENAISSANCE & BAROQUE · MID-RISE BLOCK · baroque · 22×16 M, 4 STOREYS

Three-quarter — the honest single frame

Il Gesu. A two-storey front stitched by great volute scrolls, giant-order pilasters layered so the centre steps forward, statue niches, a broken segmental pediment. A wall that swells.

AS A CITY: A baroque capital: church fronts, a fountain square, a palace, an obelisk on an axis.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |      |                     |        |
|------------------------------|------|---------------------|--------|
| Crown above the bare shell   | +7 m | Tallest point       | 19.8 m |
| Things breaking the roofline | 11   | Triangles           | 12,504 |
| Merged deco boxes (free)     | 1042 | Minted meshes (not) | 0      |

# 28 Palladian Villa

RENAISSANCE & BAROQUE · HOUSE · palladian · 15×11 M, 2 STOREYS

Three-quarter — the honest single frame

Villa Rotonda. A piano nobile over a rusticated basement, a full temple-front portico, flanking wings, a serliana window, a shallow dome. Raised and arched where Greek Revival is grounded and gabled.

AS A CITY: A Veneto landscape of villas, barchesse, a walled garden, a canal.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +9.1 m | Tallest point       | 15.5 m |
| Things breaking the roofline | 20     | Triangles           | 15,584 |
| Merged deco boxes (free)     | 1233   | Minted meshes (not) | 7      |

# 29 Greek Revival Mansion

COLONIAL & EARLY AMERICAN · HOUSE · greekrev · 15×11 M, 2 STOREYS

Three-quarter — the honest single frame

A temple bolted to a house: gable turned to the road, full-height colonnade in front of it, a real pediment with a shadowed tympanum, painted dead white.

**AS A CITY:** A courthouse-square town of white temple fronts — bank, academy, two churches, the big house on the hill.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +6.1 m | Tallest point       | 12.5 m |
| Things breaking the roofline | 15     | Triangles           | 14,496 |
| Merged deco boxes (free)     | 1176   | Minted meshes (not) | 6      |

# 30 Antebellum Plantation House

COLONIAL & EARLY AMERICAN · HOUSE · plantation · 15×11 M, 2 STOREYS

Three-quarter — the honest single frame

Antebellum: a two-storey gallery running the full width on both floors, columns from ground to roof, hipped roof with dormers.

AS A CITY: A river road of galleried houses, an overseer's cottage, a raised creole townhouse.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +5.1 m | Tallest point       | 11.5 m |
| Things breaking the roofline | 18     | Triangles           | 32,488 |
| Merged deco boxes (free)     | 2694   | Minted meshes (not) | 2      |

# 31 Brick Colonial House

COLONIAL & EARLY AMERICAN · HOUSE · brickhouse · 15×11 M, 2 STOREYS

Three-quarter — the honest single frame

Georgian/Colonial: solid brick laid symmetrically about a centre door, side-gabled roof, a chimney at each end. Its argument is DECORUM.

AS A CITY: A colonial town of manners — meeting house, tavern, the row houses, the governor's house.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +6.6 m | Tallest point       | 13 m   |
| Things breaking the roofline | 16     | Triangles           | 17,056 |
| Merged deco boxes (free)     | 1408   | Minted meshes (not) | 2      |

# 32 Spanish Colonial Mansion

COLONIAL & EARLY AMERICAN · HOUSE · spanish · 15×11 M, 2 STOREYS

Three-quarter — the honest single frame

Spanish Colonial: white stucco, a low-pitch clay barrel-tile roof, arcaded loggia, wrought iron, a bell-gable.

AS A CITY: A mission town: the mission itself, the hacienda, the plaza arcade, the courtyard house.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +7.6 m | Tallest point       | 14 m   |
| Things breaking the roofline | 21     | Triangles           | 20,932 |
| Merged deco boxes (free)     | 1701   | Minted meshes (not) | 5      |

# 33 Chicago Loft

INDUSTRIAL 19TH CENTURY · MID-RISE BLOCK · brick · 22×16 M, 4 STOREYS

Three-quarter — the honest single frame

Chicago loft, c.1905. Load-bearing brick read as STRUCTURE: piers between the bays, segmental arches, a corbelled cornice, cast-iron storefront, fire escape down the flank.

AS A CITY: A warehouse district that became lofts. Siblings: the mill building, the printing house, the brick-and-timber garment block.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +2.2 m | Tallest point       | 15 m   |
| Things breaking the roofline | 8      | Triangles           | 17,424 |
| Merged deco boxes (free)     | 1452   | Minted meshes (not) | 0      |

# 34 Ashlar Bank

INDUSTRIAL 19TH CENTURY · MID-RISE BLOCK · stone · 22×16 M, 4 STOREYS

Three-quarter — the honest single frame

Ashlar bank in three parts — rusticated base, plain shaft, attic over a heavy cornice — with a giant order solved backwards from the roofline.

AS A CITY: A financial quarter of stone institutions: the exchange, the courthouse, the trust company, the library.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +1.9 m | Tallest point       | 14.8 m |
| Things breaking the roofline | 10     | Triangles           | 23,256 |
| Merged deco boxes (free)     | 1870   | Minted meshes (not) | 10     |

# 35 Second Empire

INDUSTRIAL 19TH CENTURY · MID-RISE BLOCK · victorian · 22×16 M, 4 STOREYS

Three-quarter — the honest single frame

Second Empire. Mansard roof with dormers punching through, projecting oriel bays, a deep bracketed cornice over a cast-iron storefront.

AS A CITY: A 19th-century downtown: the opera house, the hotel, the department store, the rooming block.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +5.4 m | Tallest point       | 18.3 m |
| Things breaking the roofline | 18     | Triangles           | 34,276 |
| Merged deco boxes (free)     | 2787   | Minted meshes (not) | 12     |

# 36 Queen Anne Painted Lady

INDUSTRIAL 19TH CENTURY · HOUSE · queenanne · 15×11 M, 2 STOREYS

Three-quarter — the honest single frame

The painted lady: asymmetric mass, a corner turret, a wraparound porch, three colours of shingle and spindlework everywhere.

AS A CITY: An 1890s residential hill. Siblings: Stick, Shingle, Eastlake. The most ornament per square metre in the kit.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +9.1 m | Tallest point       | 15.5 m |
| Things breaking the roofline | 24     | Triangles           | 31,954 |
| Merged deco boxes (free)     | 2598   | Minted meshes (not) | 15     |

# 37 Seagram Curtain Wall

EARLY 20TH CENTURY · TOWER · intl · 34×28 M, 40 STOREYS

Three-quarter — the honest single frame

Seagram, 1958. Bronze mullions on an absolutely regular grid, a plaza, a lobby set back behind free-standing columns. No ornament anywhere — it survives on proportion alone.

AS A CITY: A corporate downtown. The three siblings are the variations Mies's imitators made: travertine spandrels, a black-steel version, a white-marble civic slab.

From the pavement — the entrance

The crown — the whole identity at skyline distance

|                              |        |                     |         |
|------------------------------|--------|---------------------|---------|
| Crown above the bare shell   | +3.5 m | Tallest point       | 131.5 m |
| Things breaking the roofline | 9      | Triangles           | 67,992  |
| Merged deco boxes (free)     | 5666   | Minted meshes (not) | 0       |

# 38 Zoning Setback Tower

EARLY 20TH CENTURY · TOWER · ziggurat · 34×28 M, 40 STOREYS

Three-quarter — the honest single frame

The 1916 New York zoning envelope: mandatory setbacks stepping the tower back from the street as it rises, so the shape is a law made visible.

AS A CITY: Pre-war Manhattan. Siblings: the wedding-cake hotel, the setback courthouse, the stepped power-company HQ.

From the pavement — the entrance

The crown — the whole identity at skyline distance

|                              |         |                     |         |
|------------------------------|---------|---------------------|---------|
| Crown above the bare shell   | +40.5 m | Tallest point       | 168.5 m |
| Things breaking the roofline | 17      | Triangles           | 69,134  |
| Merged deco boxes (free)     | 5745    | Minted meshes (not) | 3       |

# 39 Radiator Crown

EARLY 20TH CENTURY · TOWER · sunburst · 34×28 M, 40 STOREYS

Three-quarter — the honest single frame

Chrysler's radiator crown: stacked arcs of decreasing radius, dormer eyes, a spire. The crown is the entire building's argument.

AS A CITY: The crown competition of 1930 — every tower in the district trying to out-terminate the last one. The richest sibling set in the kit.

From the pavement — the entrance

The crown — the whole identity at skyline distance

|                              |         |                     |         |
|------------------------------|---------|---------------------|---------|
| Crown above the bare shell   | +35.3 m | Tallest point       | 163.3 m |
| Things breaking the roofline | 11      | Triangles           | 81,858  |
| Merged deco boxes (free)     | 6808    | Minted meshes (not) | 2       |

# 40 Cathedral of Commerce

EARLY 20TH CENTURY · TOWER · neogothic · 34×28 M, 40 STOREYS

Three-quarter — the honest single frame

Woolworth, the Cathedral of Commerce: a Gothic cathedral stretched to 60 storeys, buttresses and pinnacles all the way up.

AS A CITY: The 1913 skyline where every tower borrowed a cathedral. Siblings: Tribune Tower's flying buttresses, a spired campanile, a Gothic crown on a stone shaft.

From the pavement — the entrance

The crown — the whole identity at skyline distance

|                              |         |                     |         |
|------------------------------|---------|---------------------|---------|
| Crown above the bare shell   | +62.3 m | Tallest point       | 190.3 m |
| Things breaking the roofline | 10      | Triangles           | 100,152 |
| Merged deco boxes (free)     | 8346    | Minted meshes (not) | 0       |

# 41 Deco Tower

EARLY 20TH CENTURY · MID-RISE BLOCK · artdeco · 22×16 M, 4 STOREYS

Three-quarter — the honest single frame

1930 setback commercial block. Fluted piers run base to crown with the spandrels pushed back behind them; nothing horizontal is allowed to cross a pier.

AS A CITY: A whole deco main street: theatre, department store, telephone exchange, hotel.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +6.5 m | Tallest point       | 19.3 m |
| Things breaking the roofline | 13     | Triangles           | 14,588 |
| Merged deco boxes (free)     | 1209   | Minted meshes (not) | 1      |

# 42 Tapered Spire

LATE 20TH CENTURY · TOWER · pyramid · 34×28 M, 40 STOREYS

Three-quarter — the honest single frame

Transamerica. A tapered spire with the whole elevation converging on a point, wing buttresses at the shoulders.

AS A CITY: A skyline of tapers — obelisk, needle, stepped cone. Rare and expensive to over-use; one per district.

From the pavement — the entrance

The crown — the whole identity at skyline distance

|                              |         |                     |         |
|------------------------------|---------|---------------------|---------|
| Crown above the bare shell   | +64.3 m | Tallest point       | 192.3 m |
| Things breaking the roofline | 11      | Triangles           | 90,712  |
| Merged deco boxes (free)     | 7546    | Minted meshes (not) | 2       |

# 43 Bundled Tube

LATE 20TH CENTURY · TOWER · bundled · 34×28 M, 40 STOREYS

Three-quarter — the honest single frame

Sears/Willis. Nine square tubes in a 3x3 bundle that stop at different heights. Almost no surface treatment; pure massing.

AS A CITY: A structural-expression downtown: tube, bundle, diagonal, hat truss. Cold, enormous, recognisable at 20 km.

From the pavement — the entrance

The crown — the whole identity at skyline distance

|                              |       |                     |        |
|------------------------------|-------|---------------------|--------|
| Crown above the bare shell   | +54 m | Tallest point       | 182 m  |
| Things breaking the roofline | 16    | Triangles           | 68,756 |
| Merged deco boxes (free)     | 5711  | Minted meshes (not) | 4      |

# 44 Braced Tube

LATE 20TH CENTURY · TOWER · megabrace · 34×28 M, 40 STOREYS

Three-quarter — the honest single frame

The braced tube — giant X-bracing crossing many storeys on the outside of the glass, structure as the only ornament.

AS A CITY: Siblings: the diagrid, the outrigger belt truss, the exposed mega-column. An engineer's city.

From the pavement — the entrance

The crown — the whole identity at skyline distance

|                              |         |                     |         |
|------------------------------|---------|---------------------|---------|
| Crown above the bare shell   | +31.5 m | Tallest point       | 159.5 m |
| Things breaking the roofline | 12      | Triangles           | 77,336  |
| Merged deco boxes (free)     | 6426    | Minted meshes (not) | 4       |

# 45 Faceted Prism

LATE 20TH CENTURY · TOWER · faceted · 34×28 M, 40 STOREYS

Three-quarter — the honest single frame

Bank of China, 1990. The prism is CUT: quadrants rise to four different heights with long diagonals running across dozens of storeys.

AS A CITY: A crystal district. Siblings are the other cuts — the sheared top, the twisted shaft, the folded plate.

From the pavement — the entrance

The crown — the whole identity at skyline distance

|                              |         |                     |         |
|------------------------------|---------|---------------------|---------|
| Crown above the bare shell   | +44.8 m | Tallest point       | 172.8 m |
| Things breaking the roofline | 47      | Triangles           | 77,260  |
| Merged deco boxes (free)     | 6427    | Minted meshes (not) | 3       |

# 46 Broken Pediment

LATE 20TH CENTURY · TOWER · postmodern · 34×28 M, 40 STOREYS

Three-quarter — the honest single frame

AT&T, 1984. A classical broken pediment on top of a skyscraper — deliberately absurd, deliberately memorable.

AS A CITY: The 1980s. Siblings: the Chippendale sibling, the pink granite arch, the temple-front bank. A city with a sense of humour.

From the pavement — the entrance

The crown — the whole identity at skyline distance

# 47 Supertall Slim

LATE 20TH CENTURY · TOWER · pencil · 20×18 M, 48 STOREYS (SLIM PLAN — THIS GRAMMAR'S OWN)

Three-quarter — the honest single frame

The supertall slim: a 1:12 shaft, open mechanical floors punched through it for wind, a razor top.

AS A CITY: Billionaires' Row. Siblings: the setback needle, the concrete-core stack, the paired-tower slot. A city of impossibly thin things.

From the pavement — the entrance

The crown — the whole identity at skyline distance

|                              |         |                     |         |
|------------------------------|---------|---------------------|---------|
| Crown above the bare shell   | +31.9 m | Tallest point       | 185.5 m |

| Merged deco boxes (free)     | 7190    | Minted meshes (not) | 2       |

# 48 Beton Brut

LATE 20TH CENTURY · MID-RISE BLOCK · brutalist · 22×16 M, 4 STOREYS

Three-quarter — the honest single frame

Beton brut. Every opening a hole punched through a thick wall, hooded so it throws a hard shadow all day; board-formed plank lines; lifted on pilotis.

AS A CITY: A concrete civic campus — city hall, the library, the parking structure, the housing slab. Grim and coherent.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +5.7 m | Tallest point       | 18.5 m |
| Things breaking the roofline | 11     | Triangles           | 11,748 |
| Merged deco boxes (free)     | 979    | Minted meshes (not) | 0      |

# 49 Exostructure

LATE 20TH CENTURY · MID-RISE BLOCK · hightech · 22×16 M, 4 STOREYS

Three-quarter — the honest single frame

Inside-out, Lloyd's / Pompidou: the frame stands proud of the glass, the risers and stair are outside, and the roof plant is architecture.

AS A CITY: A services-on-the-outside quarter. Siblings: the exposed-truss shed, the tension-rod atrium, the gantry-served lab.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |      |                     |        |
|------------------------------|------|---------------------|--------|
| Crown above the bare shell   | +7 m | Tallest point       | 19.8 m |
| Things breaking the roofline | 39   | Triangles           | 19,316 |
| Merged deco boxes (free)     | 1521 | Minted meshes (not) | 27     |

# 50 Desert Modern House

CONTEMPORARY · HOUSE · desertmod · 15×11 M, 2 STOREYS

Three-quarter — the honest single frame

Palm Springs, 1962. A single thin roof blade with 2-6 m of overhang, steel posts, plate glass, a breeze-block screen. Architecture as the management of sun.

AS A CITY: A mid-century desert suburb: butterfly roof, folded plate, the post-and-beam, the screen-wall bungalow.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +3.6 m | Tallest point       | 10 m   |
| Things breaking the roofline | 18     | Triangles           | 11,136 |
| Merged deco boxes (free)     | 928    | Minted meshes (not) | 0      |

# 51 Modern Tech House

CONTEMPORARY · HOUSE · techhouse · 15×11 M, 2 STOREYS

Three-quarter — the honest single frame

Contemporary glass house: stacked cantilevered volumes, floor-to-ceiling glazing, a wood-slat screen, a flat roof with a parapet.

AS A CITY: A hillside of modern spec houses. The least characterful pick, and the most likely to read as generic.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |       |
|------------------------------|--------|---------------------|-------|
| Crown above the bare shell   | +1.6 m | Tallest point       | 8 m   |
| Things breaking the roofline | 9      | Triangles           | 6,012 |
| Merged deco boxes (free)     | 481    | Minted meshes (not) | 3     |

# 52 Plain House

CONTEMPORARY · HOUSE · ranch · 15×11 M, 2 STOREYS

Three-quarter — the honest single frame

Plain house. A long low box, shallow gable, picture window, an attached carport. Deliberately the boring one — it is what a street NEEDS between the loud ones.

AS A CITY: Post-war tract suburbia: ranch, split-level, cape, minimal traditional. Background architecture, and a city is mostly background.

From the pavement — the entrance

Rear three-quarter — is it a stage set?

|                              |        |                     |        |
|------------------------------|--------|---------------------|--------|
| Crown above the bare shell   | +4.9 m | Tallest point       | 11.3 m |
| Things breaking the roofline | 18     | Triangles           | 15,428 |
| Merged deco boxes (free)     | 1279   | Minted meshes (not) | 1      |

# 53 Arcology Terrace

NEAR FUTURE · TOWER · arcology · 34×28 M, 40 STOREYS

Three-quarter — the honest single frame

Planted terraces stepping back on every face, sky-bridges between masses, and a wind-scoop void punched clean through the upper mass — a hole in the building.

AS A CITY: A vertical district: linked arcologies, sky-farms, a ground plane given back to water.

From the pavement — the entrance

The crown — the whole identity at skyline distance

|                              |         |                     |         |
|------------------------------|---------|---------------------|---------|
| Crown above the bare shell   | +36.5 m | Tallest point       | 164.5 m |
| Things breaking the roofline | 10      | Triangles           | 67,980  |
| Merged deco boxes (free)     | 5665    | Minted meshes (not) | 0       |

# 54 Printed Shell

NEAR FUTURE · TOWER · printed · 34×28 M, 40 STOREYS

Three-quarter — the honest single frame

Printed in place. Continuous horizontal bead courses running unbroken around the building, each offset from the last so the wall swells and waists. No straight vertical edge anywhere.

AS A CITY: A printed settlement — lobed towers, extruded low blocks, a landscape with no right angles.

From the pavement — the entrance

The crown — the whole identity at skyline distance

|                              |         |                     |         |
|------------------------------|---------|---------------------|---------|
| Crown above the bare shell   | +17.5 m | Tallest point       | 145.5 m |
| Things breaking the roofline | 15      | Triangles           | 53,340  |
| Merged deco boxes (free)     | 4445    | Minted meshes (not) | 0       |

# 55 Mass Timber Tower

NEAR FUTURE · TOWER · masstimber · 34×28 M, 40 STOREYS

Three-quarter — the honest single frame

CLT and glulam. A heavy timber grid standing outside the glass, warm against cool grey, and planted setback terraces where the structure steps in. Warm and orthogonal where high-tech is metal and industrial.

AS A CITY: A timber downtown: CLT towers, a market hall on glulam arches, planted decks.

From the pavement — the entrance

The crown — the whole identity at skyline distance

|                              |         |                     |         |
|------------------------------|---------|---------------------|---------|
| Crown above the bare shell   | +27.8 m | Tallest point       | 155.8 m |
| Things breaking the roofline | 11      | Triangles           | 74,292  |
| Merged deco boxes (free)     | 6191    | Minted meshes (not) | 0       |
